

Db2 for z/OS REST and Hybrid Cloud Lab Documentation

Optional Lab 2A:

z/OS Connect Integration and OpenAPI 3.0

IBM Software

Created for Db2 REST for Hybrid Cloud Wildfire Workshop

Date: January 31, 2023

Version: V4.0

Authors:

Tadas Varaneckas

MacKenna Kelleher

Overview

z/OS Connect has features to create APIs to the Open API 2.0 specification and for the OPEN API 3.0 specification.

This lab exercise will use the z/OS Connect features to create an Open API 3.0 API that drives a Db2 native rest service.

This exercise is the same exercise used in the z/OS Connect Workshops. The exercise booklet can be downloaded from: <https://ibm-wsc.github.io/WSC-CMDB21/2021%20WW%20Lab%20V3.pdf>

It can also be accessed in the virtual lab environment. It is in the OPENAPI3 folder on the virtual desktop. The name of the file is: **Db2 for zOS REST and Hybrid Cloud.pdf**

NOTE:

For the Db2 REST and Hybrid Cloud Workshop, you only need to do the lab exercise up through page 65. The steps covered in pages 66 – 77 are covered in the **z/OS Connect Introduction workshop** and this workshop.

However, you are welcome to complete the entire workshop if you choose to.
